Question

testing methods   60
of test cases == # testing methods   NO
# of testing Classes   5
Recipe.setPrice() =>

                                        # testing methods
                                        Are there an Expected Exception
                                        # of statments throw new RecipeException
                                        # of statments amtPrice = Integer.parseInt

Recipe.toString() =>

                                        # testing methods
                                        is the code same ==> public String toString

RecipeBook.addRecipe() =>   # testing methods
                                        is there a test case to check if adding new
                                        is there a test case for duplication (same n
                                        is there a test case for Null Recipe ?
                                        is there a test case for adding 5 Recipes?
                                        is there a correction for addRecipe code?

RecipeBook
                                        is there a test case that add 4 Recipes an
                                        is there a correction for addRecipe & dele

Clone the project on your machine

                                        run all testing methods
                                        # of Passed test cases
                                        # of Failed test cases
                                        is there a test suite to run all testing classes?
